EDUCATION

NCRD's Sterling Institute of Management Studies

Master of Computer Application(MCA)
CGPA: 7.89/10

2022 – 2024

Pillai College of Arts, Commerce & Science

Bachelor of Science Information Technology
CGPA: 8.28/10

2019 – 2022

EXPERIENCE

Fortune4 Technologies

Trainee Software Tester

May 2025 – Apr 2026

Project: [Titan Eye Plus Eyewear](#) & [Fastrack Eyewear](#) (E-commerce Websites & Mobile Applications)

- Collaborated with frontend and backend teams to understand web application workflows, API integrations, and business logic.
- Performed functional and API testing using Postman, analyzing request/response flows and validating backend modules built with PHP and Magento.
- Designed and executed test cases for key modules like user management, payments, and inventory to ensure a seamless user experience.

MentorrBuddy

Web Development Intern

Feb 2024 – June 2024

- Developed an online examination web application using Spring Boot and MySQL, implementing a user-friendly interface that boosted student engagement by 40%, along with Spring Security, email notifications, and session management for enhanced security.
- Architected the application following MVC architecture, optimized features for better performance, and collaborated with the team to improve maintainability and user satisfaction.

PROJECTS

LinkedIn Application Clone

[GitHub link](#)

April 2025

- Built a LinkedIn-style social media platform using Spring Boot with a microservices architecture, including User Service, Post Service, and Connection Service, improving modularity and scalability.
- Implemented Spring Security with API Gateway, enhancing authentication and authorization, securing 100% of API requests.
- Integrated Neo4j graph database in the Connection Service, enabling efficient retrieval of 1st, 2nd, and 3rd-degree connections, reducing query response time by 40%.
- Utilized Kafka for real-time, asynchronous notifications and inter-service communication, ensuring 99.9% message delivery reliability.
- Dockerized the microservices architecture using Docker and integrated Eureka Server for service discovery, ensuring high availability and efficient service management.

Uber – Cab booking service

[GitHub link](#)

December 2024

- Engineered a backend clone of Uber using Spring Boot, enabling users to book rides online seamlessly.
- Analyzed ride booking strategies and implemented Design Patterns, potentially reducing ride waiting times by 50%.
- Strengthened application security by implementing Authentication and Authorization using Spring Security.
- Directed the end-to-end ride booking flow, including ride requests, driver acceptance, and payment processing via wallets.

Certifications:

- [Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate](#)
- [Java Spring Boot by Coding Shuttle 2024](#)
- [Advance Java | Enterprise Edition, MySirG.com 2024](#)
- Java Standard Edition, MySirG.com, 2023
- Machine Learning, Mahatma Education Society's PCACS college, 2022

SKILLS

Programming: Java, Python, C/C++, JavaScript.

Frameworks and libraries: Spring Boot, ReactJS, Bootstrap

Database Management: MySQL, PostgreSQL, DBeaver.

Other Tools: RESTful APIs, Postman, Git, GitHub, Docker, RESTful APIs, SDLC, problem-solving skills.
